

Product datasheet for **TA337154**

IL17E (IL25) Mouse Monoclonal Antibody [Clone ID: 8B1]

Product data:

Product Type:	Primary Antibodies
Clone Name:	8B1
Applications:	FC, WB
Recommend Dilution:	WB: 0.5-2ug/ml~, FC: 1-2ug/ml
Reactivity:	Human
Host:	Mouse
Isotype:	IgG1, kappa
Clonality:	Monoclonal
Immunogen:	Full-length human IL17E recombinant protein was used as the immunogen for this antibody.
Formulation:	PBS containing 0.05% BSA, 0.05% Sodium Azide. Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.
Concentration:	0.5 mg/ml
Purification:	Protein G purified
Gene Name:	interleukin 25
Database Link:	NP_758525 Entrez Gene 64806 Human
Background:	As a member of the IL-17 family, IL-25 has been identified as a pro-inflammatory cytokine which is produced by Th17 effector cells thus enabling the TH17 subset to initiate or maintain the autoimmune process in diseases such as Rheumatoid Arthritis (1-3). IL-25 appears to stimulate IL-8 production and itself appears to be activated through IL-23, IL-6, and TGF-Beta (1). Studies of IL-25 expression and activation through NF-kB taken together with IL-17 production and Th17 polarization through TLR ligand activation further closely tie the IL-17 and Th17 family together with the TLR signaling network initiating and controlling immune responses (4-7).
Synonyms:	IL17E
Protein Families:	Druggable Genome, Secreted Protein, Transmembrane
Protein Pathways:	Cytokine-cytokine receptor interaction
