Product datasheet for TA504459

MPP5 Mouse Monoclonal Antibody [Clone ID: OTI5E10]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI5E10

Applications: WB

Recommend Dilution: WB 1:2000

Reactivity: Human Host: Mouse

Isotype: lgG1

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human MPP5(NP_071919) produced in HEK293T

cell

Formulation: PBS (PH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.

Concentration: 1 mg/ml

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Predicted Protein Size: 77.1 kDa

Gene Name: membrane palmitoylated protein 5

Database Link: NP 071919 Entrez Gene 64398 Human

Background: Members of the peripheral membrane-associated guanylate kinase (MAGUK) family function

in tumor suppression and receptor clustering by forming multiprotein complexes containing distinct sets of transmembrane, cytoskeletal, and cytoplasmic signaling proteins. All MAGUKs contain a PDZ-SH3-GUK core and are divided into 4 subfamilies, DLG-like (see DLG1; MIM 601014), ZO1-like (see TJP1; MIM 601009), p55-like (see MPP1; MIM 305360), and LIN2-like (see CASK; MIM 300172), based on their size and the presence of additional domains (Tseng et al., 2001 [PubMed 11311936]). MPP5 is a member of the p55-like MAGUK subfamily.

[supplied by OMIM]

Synonyms: PALS1

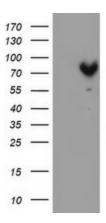

Protein Families: Druggable Genome

Protein Pathways: Tight junction

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY MPP5 ([RC224752], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-MPP5. Positive lysates [LY411659] (100ug) and [LC411659] (20ug) can be purchased separately from OriGene.
